

## Competency Framework: **Core Behaviours**

When success comes from the consistently high standards your people achieve, you put them first.

### **Our people**

We're continually improving and growing. We're doing that by realising the potential of our people. In February 2014 we achieved the Investors in People standard, a globally recognised mark of excellence that demonstrates our commitment to developing our company through our most valuable resource, our people.

'**What** we do is determined by our competency, **How** we should do it is defined within these **Core Behaviours**. Our behaviour dictates our culture, whether Hutchinson is a positive, enjoyable place to work relies largely on the following:

How **We** do things

How **We** expect to be treated

How **We** treat each other
